

NATURAL GAS TRANSPORTATION PROCESS

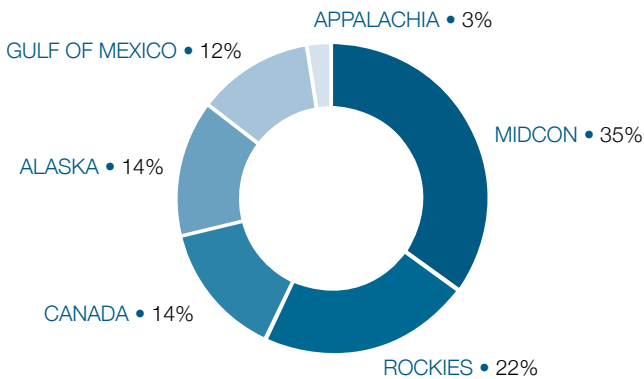

SUPPLY › SERVICE › SATISFACTION ›

1. PRODUCERS SELL GAS to a Marketer Such as EnergyUSA

EnergyUSA, with a 2+ decade foothold in the industry, was one of the first natural gas marketing companies in the United States. This experience has enabled us to develop strong, longstanding relationships with all major natural gas suppliers.

WHERE DOES U.S. GAS COME FROM?

SUPPLY › SERVICE › SATISFACTION ›

2. MARKETER ARRANGES TRANSPORTATION on Interstate Pipeline(s)

EnergyUSA owns firm (as opposed to interruptible) capacity on multiple pipelines from the major U.S. gas-producing regions up to many Midwest Local Distribution Companies (LDCs) such as NIPSCO, NICOR, Vectren, Columbia Gas of Ohio, Citizens Gas, Cinergy, MichCon, and Consumers. In addition, EnergyUSA owns market-area and supply-area storage to ensure available gas supplies for all our customers.

3. LDC ACCEPTS GAS from Marketer at LDC'S "City Gate" or Receipt Point

EnergyUSA manages and balances daily gas deliveries into the LDC's systems to ensure customer's supply needs are met. This allows our customers to focus on their core business rather than spending time on natural gas issues.

4. LDC DELIVERS GAS to End User's Facility

By partnering with EnergyUSA, customers receive the same reliable gas supply but also enjoy substantial savings on their natural gas bills.
